- Two Motors
- Handmade in England
- **Memory Foam Mattress as standard**
- Beech Slats
- Available in polished leg or divan
- Optional Massage System
- Free Headboard
- Lifetime Guarantee
- Free Home Demonstration

One of the best adjustable beds currently available on the market, our handmade beds provides comfort and support to everyone that uses them. With a 5 fold, two motor action the bed will follow the contours of the body to ensure you are fully supported, particularly in the lower part of the back which many people find to be a problem.

Our bed is supplied as a complete package comprising of the base, the headboard and a top of the range memory foam mattress, enabling you to get using your bed and have a good night sleep straight away. We can also provide a memory foam pillow if required.

Using the bed is simple, and operated using a 6 button handset with pictures, enabling you to quickly find the position perfect for you. The legs can be raised to increase comfort on the back and ease the symptoms of fluid retention and poor circulation. The top end of the bed can be raised to allow a comfortable sleeping or sitting position without the need of multiple pillows. An excellent option for anyone with breathing difficulties, Hiatus Hernia or bad backs who struggle to sleep in a standard bed.

As part of our complete service a representative can visit you in your home and will bring a bed for you to try and receive a complete demonstration, something not offered by many other leading bed companies. Once you are happy with the bed and have decided on a suitable package we will make you a bed in the size you require. As part of our excellent service when we deliver your bed we will, if so required, remove your old bed, all included as part of our package.

As our beds are tailor made for the individual please call us for an up to date price, or to arrange for a representative to call.

Comfort PLUS Products

Memory Foam Mattress

Features

- Any Size available
- Non Turn Mattress
- Molds to the contours of your body
- Massage System fitted as standard
- Sold separately or as part of our bed package
- High grade mattress
- Free Home Demonstration

All of our adjustable beds include a memory foam mattress as part of our bed package. We do however sell our mattresses separately as we understand many people do not require the benefits of an adjustable bed but would gain additional comfort from a memory foam mattress.

The memory foam mattresses use technology originally developed by NASA, and although never used for any space missions, its benefits were quickly recognised and quickly adopted by Hospitals and the medical industry. The mattresses have now become available on the general consumer market and have quickly become recognised as one of the best mattresses on the market.

The material used in the memory foam mattress is seen as the most effective substance for relieving pressure points caused by the weight of the human body. This will benefit many different conditions but also will offer support to the entire body ensuring more comfort and reduced aches in bed.
