

Comfort PLUS Products

Bathlift

Features / Specification

- Reclining backrest
- Removable covers
- Stainless steel frame and fixings
- Smooth, quiet operation
- Extremely stable
- Safety features
- Fully portable

Difficulties getting in and out of the bath are quickly and easily overcome when using the comfort plus bathlift. A bathlift designed with both user and carer in mind to assist with safe, independent bathing.

The Bathlift is fully portable and is simple to take in and out of the bath. Separating into two parts, to make handling easier, the seat locks down when folded for safe transportation. With a steady, quiet action, the Bathlift is raised and lowered effortlessly using a hand control with broad pads that are designed to be operated using any part of the hand.

The built in safety mechanism ensures that if the batteries are running down, the lift cannot be lowered, but it can always be raised. Large side flaps allow easy transfer into and out of the bath, which may be further improved by utilising the optional swivelling transfer seat. The feet may be angled in many directions to suit the curvature of the bath bottom. The machine washable covers are easily removed and replaced and extra sets are available at an affordable price.
